

If facilities are a reflection of the companies they house, then Hostway's new data center mirrors a reliable, growing company with state-of-the-art equipment. This new space will allow Hostway to offer colocation in Chicago for the first time and to expand its world-class hosting services.

Located at 100 North Riverside Plaza, in Boeing International's modern skyscraper, the facility is in the heart of downtown Chicago. With 36 stories and almost 1 million square feet of office space, the building is home to Boeing International's world headquarters. The data center will occupy a space originally built out for \$200 million. Hostway is investing an additional \$10 million to ensure the data center meets the leading industry standards for security, network availability, fire suppression and power capacity.

- **Reliable**
  - Seven dedicated electrical feeds
  - Powered by five different substations
  - Connected to multiple transfer switches
  - 1,500 kVA of uninterruptible power supply
  - Weekly testing of back-up generators
- **Secure**
  - 24x7 live closed circuit TV monitoring
  - Biometric access control
  - Redundant power supplies
  - Multiple HVAC systems
  - Disaster recovery and geographic load balancing
- **Growing**
  - Capacity for 17,000 servers
  - 31,000 square feet of server space
  - Adds 50,000 square feet to total footprint
  - Brings global footprint to 450,000 square feet
  - Provides colocation services in Chicago
- **State-of-the-Art**
  - Level 3 and HGTN connective
  - Accommodates custom build-outs
  - 1,000 tons of available cooling
  - \$10 million in upgrades
  - Formerly site of Ameritech's mission-critical facility

Hostway's Tier 1 data centers in key locations across the globe are all built out with N+1 redundancy. The new data center is Hostway's 11th, and one of the largest commercially operating data centers in downtown Chicago.
