

Protection and Security

To Keep Your Business Running Smoothly

You wouldn't leave your front door unlocked at night so why would you ever leave your server unprotected? As much as we want to believe servers are safe from attacks, the truth is, extra protection is not only a good idea—it's a requirement. Hostway has the firewall solutions that give you reassurance and security you can trust. Configured and managed by the network security experts at Hostway, our firewall products are an ideal supplement to the strength and protection you already receive from Hostway's dedicated servers.

Benefits:

- > Keep bad guys out and good guys coming in
- > Fully managed by Hostway; no more fussing with Firewall setup
- > Affordably priced for everyone
- > Scalable solution that can grow as you grow
- > One less thing to worry about

Feature Highlights:

- > Proven technology certifies the validity and integrity of every packet passed through the system
- > 99.99% uptime guaranteed backed by industry leading SLA
- > Award-winning support team is available 24x7x365
- > Hostway network security professionals help configure your firewall based on your optimal settings requirements
