

## Dedicated To Complete Flexibility

TruFlex™ Servers are rock-solid, managed dedicated servers that provide a robust, highly adaptable and reliable environment for busy IT managers who know exactly what they want and when they want it. TruFlex Servers can handle any mission critical hosting requirements while saving users time and money—they can be tailored to your exact technical and budgetary requirements. TruFlex servers give customers the freedom to determine which level of service they need from their hosting company, customize their infrastructure, and only pay for the services they require.
