HOSTWAY NETWORK SERVICES

Powered by the very latest in network hardware, Hostway's Network Services leverage a global footprint and extensive industry relationships to provide the very best services for online business. From small business to government, our Network Services diverse product offering makes perfect sense. Our customer-centric operations and support teams make dealing with your provider a refreshing experience. Qualified sales and provisioning ensure that your new services are effortlessly deployed with an enthusiasm for your success that other providers may neglect.

Fast, reliable, local connectivity to the Internet in IPv4 and IPv6 flavors.

Tier 1 IP Transit:

Get direct routes to all the heavy hitters, including but not limited to Level3, XO, Verizon, Time Warner, BrightHouse, Cogent, AT&T, Comcast, SBC, Optimum Online and many others. Our industrial-strength SLA ensures your mission critical services are available. Also available with our IP Transit is our automated Layer 4 – 7 DDoS protection and filtering for connected networks.

Connect your remote sites with a flexible array of options.

Transport:

Point-to-Point Ethernet Service enables companies with specific needs to take advantage of our fully-redundant, nation-wide backbone to reach providers, peering points or that huge customer at gigabit speeds.

Virtual LAN Service provides a single broadcast-domain Ethernet connectivity product that spans the globe. Effortlessly extend your network footprint with peace of mind. Your network becomes global and scales to meet the needs of a growing business.

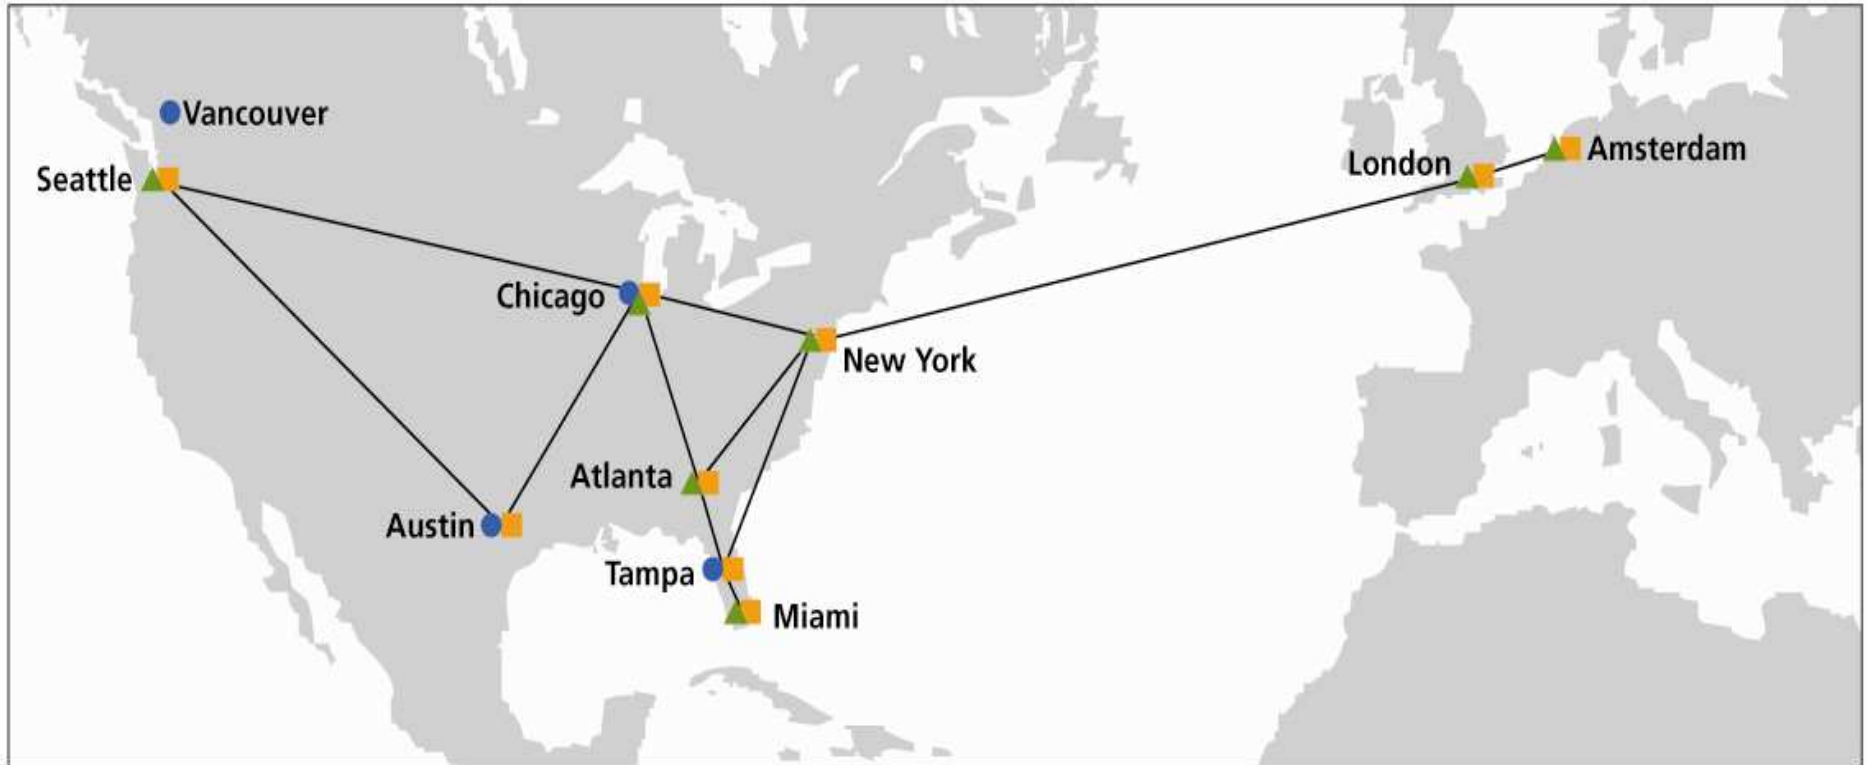

Keep it to yourself. Really fast.

Secure IP-VPN:

Military-grade ciphers keep your sensitive information from prying eyes as it travels at speeds of up to 2Gbit. Our PCI-compliant facilities and hardware ensure data (and company) integrity.

Carrier Neutral Colocation:

Hostway offers carrier neutral colocation that provides access to multiple Tier 1 Carriers including AT&T, Sprint, Verizon Business, XO, Cogent, Level3, Time Warner, BrightHouse, FiberLight, FPL FiberNet, Nuvox, ITC Deltacom and others. This wide range of connectivity provides direct access to local, national and international wireline, wireless, private, public and dark fiber networks.
